

ongoing trials - trial from [www.clinicaltrials.gov](http://www.clinicaltrials.gov)

## **Evaluation of the effectiveness of 7% plus hypertonic saline in comparison with 7% hypertonic saline in reducing the growth of *Pseudomonas aeruginosa* in lung of the patient with cystic fibrosis disease. - Recruiting**

**Code:** IRCT20201017049055N1 **Year:** 2021 **Date:** April 1, 2021

**Author:**

### **Study design (if review, criteria of inclusion for studies)**

Interventional - Allocation: Randomized|Intervention Model: Crossover Assignment|Masking: None (Open Label)|Primary Purpose: Other

### **Participants**

Cystic Fibrosis|Pancreatic Insufficiency|Abnormal Glucose Tolerance|Diabetes - 18 Years and older (Adult, Older Adult)

### **Interventions**

Drug: Dulaglutide 0.75Mg/0.5MI Inj Pen

### **Outcome measures**

Early-phase insulin secretion|Early-phase insulin secretion adjusted for glucose excursion|Glucose tolerance
